

WORST DRAWDOWNS IN COMPARISON

Based on a period from 1/90 to 8/18. Source: Autumn Gold.

Trading futures and options involves substantial risk of loss and is not suitable for all investors. The use of the phrase “Managed Futures” refers to the asset class, and not to any individual Commodity Trading Advisors program. Be advised that an individual program could have better or worse performance results when compared to the Stock Market. There are no guarantees of profit no matter who is managing your money. Past performance is not necessarily indicative of future results. Investors should note that it is not possible to invest in these indices.

Managed Futures: CASAM CISDM CTA Equal Weighted Index reflects the average return for CTAs reporting to CISDM database. In order to be included in a CISDM CTA Index, a CTA must have at least \$500,000 under management and at least a 12- month track record.

FTSE 100 Index is an index of stocks based on the largest 100 fundamentally ranked companies.

Dow Jones Index (DJIA) is a price-weighted average of 30 significant stocks traded on the New York Stock Exchange (NYSE) and the Nasdaq

S&P 500 Total Return Index is an American stock market index based on the market capitalizations of 500 large companies having common stock listed on the NYSE or NASDAQ.

MSCI World Index is a market cap weighted stock market index of 1,649 stocks from companies throughout the world. The index includes securities from 23 countries but excludes stocks from emerging and frontier economies making it less worldwide than the name suggests

DAX Index (German stock index) is a blue chip stock market index consisting of the 30 major German companies trading on the Frankfurt Stock Exchange

Nikkei 225 Index is the leading index of Japanese stocks. It is a price-weighted index composed of Japan's top 225 blue-chip companies traded on the Tokyo Stock Exchange.

The NASDAQ is a stock market index of the common stocks and similar securities. Along with the Dow Jones Average and S&P 500 it is one of the three most-followed indices in US stock markets. The composition of the NASDAQ Composite is heavily weighted towards information technology companies.

A drawdown is the peak-to-trough decline during a specific recorded period of an investment, fund or commodity security. A drawdown is usually quoted as the percentage between the peak and the subsequent trough. Those tracking the entity measure from the time a retrenchment begins to when it reaches a new high.
